NATURE AND LIMITATIONS OF DATA

The data reported in this bulletin are based on employment and payroll information submitted by employers to the Unemployment Compensation Division on their regular quarterly tax reports. The cooperation of multi-area and multi-establishment employers in submitting supplemental employment and wage reports (form UCE-101a) and allocating their employment and wages to specific counties and industries is gratefully acknowledged. Employment of about 20,452 and wages of some \$126,191,427 could not be allocated to specific areas and, therefore, are not included in the county totals. The unallocated employment and wages represented only 3.6 and 4.7 per cent, respectively, of total covered employment and earnings for South Carolina.

The South Carolina Employment Security Law is generally not applicable to firms employing less than four workers. The law also excludes from coverage agricultural labor, government employment, railroad employment, domestic servants and employment in nonprofit institutions operated for charitable, religious and educational purposes. Even with the above noted exceptions, coverage for certain industries is very good. For example, coverage for manufacturing and mining is substantially complete, and the major portion of the construction and transportation and public utilities division is covered.

For some counties, averages may not add to totals due to rounding. Moreover, in order to maintain the confidential nature of the data reported by employers liable under the South Carolina Employment Security Law, employment and wages for major industry groups were not shown separately where there were fewer than three reporting units or when one firm, or two firms combined, constitutes 80 per cent or more of total employment in the industry. In a few industry divisions, employment and wages were withheld to avoid disclosure of operations of individual reporting units. These data have been included only in the total for all industries. However, when this precedent was used, the number of employing units was shown for the respective industry division.

It should be noted that the South Carolina Employment Security Law was amended, effective January 1, 1956, to extend coverage to firms employing four or more workers for twenty weeks. Since the law previously covered only firms employing eight or more, there was a substantial increase in covered employment between 1955 and 1957 due entirely to this change in the law.

All data are classified in accordance with the Standard Industrial Classification Manual, 1957.

NATURE AND LIMITATIONS OF DATA

The data reported in this Bulletin are based on employment and payroll information submitted by employers to the Unemployment Compensation Division on their regular quarterly tax reports. The cooperation of multi-plant and multi-establishment employers in submitting supplemental employment and wage reports (Form UCP-101a) and allocating their employment and wages to specific counties and industries is gratefully acknowledged. Employment of about 20,482 and wages of some \$126,191,447 could not be allocated to specific areas and, therefore, are not included in the county totals. The unallocated employment and wages represented only 3.6 and 4.7 per cent, respectively, of total covered employment and earnings for South Carolina.

The South Carolina Employment Security Law is generally not applicable to firms employing less than four workers. The law also excludes from coverage agricultural labor, government employment, railroad employment, domestic servants and employment in nonprofit institutions operated for charitable, religious and educational purposes. Even with the above noted exceptions, coverage for certain industries is very good. For example, coverage for manufacturing and mining is substantially complete and the major portion of the construction and transportation and public utilities division is covered.

For some counties, averages may not add to totals due to rounding. Moreover, in order to maintain the confidential nature of the data reported by employers liable under the South Carolina Employment Security Law, employment and wages for major industry groups were not shown separately where there were fewer than three reporting units or when one firm or two firms combined, constituted 50 per cent or more of total employment in the industry. In a few industry divisions, employment and wages were withheld to avoid disclosure of operations of individual reporting units. These data have been included only in the total for all industries. However, when this procedure was used, the number of employing units was shown for the respective industry division.

It should be noted that the South Carolina Employment Security Law was amended, effective January 1, 1955, to extend coverage to firms employing four or more workers for twenty weeks. Since the law previously covered only firms employing eight or more, there was a substantial increase in covered employment between 1955 and 1957 due entirely to this change in the law.

All data are classified in accordance with the Standard Industrial Classification Manual, 1957.
